

## \$500—\$1000—\$5000 Can Be Invested In a Safe Convertible 6% Investment

You have a positive right to insist upon receiving the full earning power of every dollar you invest.

Safety is ALL important—no other consideration can affect the influence of this vital factor. But the income yield is the real reason for making the investment.

The maximum earning power, consistent with safety, of invested money is absolutely fixed by laws of finance which govern every commercial relation. The individual who attempts to secure more must do so at the expense of safety itself, while the investor who is content with less is depriving himself of what is rightfully his own.

### Safe 6% First Mortgage Bonds

We own and offer First Mortgage Bonds based on improved, centrally located, income-earning Chicago real estate of the highest class.

Securities of this type offer unquestioned safety, with an unusually attractive income yield. They are the one fundamental investment.

In accordance with the rigid and unvarying policy of this house, the value of the underlying security, conservatively appraised, must be at least double the total amount of the bond issue. The annual income from the property, in every case, is at least three times the greatest annual interest charge. Every issue is covered by a title guarantee policy from a title and trust company of Chicago, guaranteeing these bonds to be absolute first lien on the property.

### 30 Years Without a Dollar Loss

For the past thirty years we have sold this class of securities exclusively, and it is a significant fact that during that entire time not one client has ever lost a single dollar, either of principal or interest, on any security purchased from us.

Quick convertibility into cash is assured through our custom of repurchasing securities from our clients, when requested, at par and accrued interest, less a handling charge of one per cent.

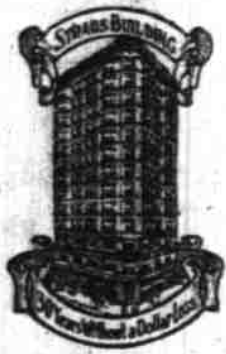

Interesting literature of extreme value to every conservative investor, including a copy of the semi-monthly investor's Magazine, will be mailed on request.

A very choice list of carefully selected, specific issues has been prepared. Ask for Circular No. 104.

## BILLBOARDS ARE NOW CENSORED AND REGULATED IN MANY CITIES

What other cities of the United States are doing to regulate billboards is shown below in a summary of reports received from a number of important municipalities:

At a recent meeting of the committee of public welfare of the Board of Supervisors it was stated by one of the billboard men that no city in the United States had limited the billboards to less than twenty feet as the maximum height.

The Examiner has investigated and presents below reports from several cities as to exactly what has been done in the campaign against the billboard evil.

Cincinnati—Wooden billboards not to exceed two feet in height. Over two feet, constructed of metal, including supports. Must not exceed twelve feet from ground to top, with twenty-four inches between ground and board. Six feet between boards and adjoining structure or lot line; two feet between boards; 500 square feet limit; fifteen feet from street line, and must not project beyond line of adjacent house. Restriction as to obscene or licentious advertising. No boards can face a public park, square or municipal building. No tax, but permit must be obtained.

Boston—The average height of billboards is ten feet. If built that high or higher the building department of the city must pass on the matter.

Buffalo—Special attention, to danger from fire. The ordinances provide that no fence or billboard feet high without a permit from the fire commissioners and the deputy building commissioners, and thereafter the permission of the common council. A violation is punishable by a fine of \$25 to \$150.

Notice to Property Owners

Rochester—No person is allowed to erect all billboards more than six feet high without permission of the bureau of buildings. An application for permission to erect a billboard of combustible material is required to give one week's notice in writing personally or by mail, of such application to the owners, occupants or agents of all houses and lots within a distance of 100 feet from where such billboard is to be erected. Such application is not considered by the bureau of buildings without a signed proof of the service of the notices required or the written consent of such owners, occupants or agents to the erection of the billboard. Billboards more than seven feet high must be constructed entirely of incombustible material, securely braced and fastened and erected in accordance with the plans approved by the bureau of buildings.

Milwaukee—Billboards are limited to a height of twelve feet with an open space at the bottom of not less than two feet. The provisions declare that the billboards shall be capable of withstanding a wind pressure of not less than forty pounds per square foot, and if within fire limits shall be constructed entirely of incombustible material. The metal plate issued with the permit must be attached to the structure. Fees are exacted for the permit and a charge made for the plate.

St. Louis—As a result of a campaign waged against the evil of billboard advertising by the Civic League of St. Louis, ordinances were adopted limiting the height of billboards to fourteen feet above the ground. For sanitary purposes a space of four feet is required between the lower edge of the billboard and the ground. To eliminate the fire risk as far as possible, no billboard is allowed to be erected nearer than six feet to any building or nearer than two feet to any other billboard, and must not approach the street nearer than fifteen feet. Fees are exacted for the issuance of the permit, based upon a charge of \$1 for every five linear feet. Charge Per Foot.

No billboards shall be erected or maintained within the city unless a permit shall have been secured from the Commissioner of Buildings, to whom application must be made and plans and specifications of the proposed billboard submitted. Permits are issued upon the payment of a fee of \$2 for every twenty-five linear feet, together with an annual charge to cover the cost of inspection. A bond is required in the sum of \$25,000 from every person or corporation engaged in such advertising business to indemnify the city from any losses by reason of any accidents resulting from such structures. Billboards within the fire limits are not allowed to exceed twelve feet in height, and must be constructed of incombustible material except stringers, uprights and braces, which may be of wood. The total height of signs above the ground must not exceed 15 feet 6 inches, and a space of 3 feet 6 inches allowed between the bottom of the board and the ground. Wooden billboards are limited to a size not exceeding 12 feet square in area. All billboards must be constructed of sufficient strength to withstand a wind pressure of twenty-five pounds to a square foot surface. Billboards are not allowed on any block where one-half of the buildings are used for residential purposes without obtaining consent in writing from a majority of the frontage.

France Takes Action. France—In France a drastic resolution is under way to restrict billboard advertising, if not for its complete elimination. On April 20, 1911, a law went into force forbidding advertisements on or near any historical monument, or in certain specified localities. This provision has recently been followed by a measure placing a heavy tax upon all advertisements which obscure or disfigure the beauty of the surrounding neighborhood. In future all placards less than six square meters in area will pay at the rate of 5 francs per square meter. The rate is increased to 100 francs a square meter for placards of six to ten square

meters; 200 francs a square meter when the size is ten to twenty square meters, and 400 francs a square meter when upward to twenty square meters. These rates are doubled if the billboard contains two advertisements; tripled if there are three, and quadrupled if there are four or more advertisements on the same board. The law provides that all land upon which are erected signs or billboards for advertising purposes shall be valued, for the purpose of assessment for taxation, at its actual value plus the revenue derived from such advertisements.

New York City—A proposed amendment to the building act is now being considered limiting fences, signs, screens and billboards and similar structures to seven feet in height with out special permission from the bureau of Buildings of New York City. An annual inspection fee amounting to 10 cents per square foot is to be paid by the owner of the billboards to the Bureau of Buildings.

### COMPOSER OPPOSES UNIVERSAL SUFFRAGE

Thinks Vote of Richard Wagner Worth Those of a Hundred Thousand Navvies

BERLIN, Nov. 10.—Dr. Richard Strauss has stirred up a hornet's nest in Liberal and Radical Germany with an open letter regarding the agitation for the perpetuating of the Wagner family's monopoly of "Parsifal." The letter contains the following attack upon the reichstag and on universal suffrage:

"Unfortunately, the decision with regard to 'Parsifal' does not rest with people who have the refinement and development of our culture at heart, but with jurists and politicians devoid of understanding the unlimited rights of intellectual property owners. 'I happened to attend the proceedings of the reichstag in which the representatives of the German people, with very few exceptions, were debating with pathetic ignorance the weighty question of copyright law. I heard a certain Eugen Richter (the late famous radical parliamentarian and finance expert) invoke the most shameless lies to tread under foot the rights of 200 miserable German composers, including Wagner's heirs, in favor of 200,000 German publicans. Things will not be better so long as universal suffrage exists and so long as votes are counted and not weighed—so long, for example, as the voice of a single Richard Wagner does not count the same as the voice of 100,000 navvies put together. No wonder the French and Italians in matters artistic still consider us barbarians."

The letter evokes ironical contempt in most quarters, where it is described as fresh evidence that a good composer can make the most stupid politician. The Berliner Zeitung remarks that Dr. Strauss is considerably more democratic on the question of box office royalties than on the question of suffrage.

### BEWARE OF COLDS.

Children are much more likely to contract the contagious diseases when they have colds. Whooping cough, diphtheria, scarlet fever and consumption are diseases that are often contracted when the child has a cold. That is why all medical authorities say beware of colds. For the quick cure of colds you will find nothing better than Chamberlain's Cough Remedy. It can always be depended upon and is pleasant and safe to take. For sale by all dealers. Benson, Smith & Co., Ltd., agents for Hawaii—advertisement.

## Makes The Hair Grow

We are talking about Ayer's Hair Vigor. Just note that word "Ayer's." You are perfectly safe with it. No harm to you or to your hair. Makes the hair grow? It certainly does. Stops falling hair, too. Remember, it's "Ayer's" we are talking about. Ask your doctor about your hair and about Ayer's Hair Vigor. Get his approval. Your own doctor and "Ayer's" make a strong combination. It means faith, confidence, satisfaction.
